

This past spring, we continued to mentor a garden club weekly at Waverly schools with more than a dozen middle school students participating and the support and collaboration of school faculty.

We completed the seventh successful year of our summer Youth Training Initiative (YTI) in Tioga County, using our gardens at Wilbur St., Lincoln St., and Waverly High School.

With the Waverly schools' Ag class and garden club, we built hydroponic systems and produced various greens throughout the winter & spring.

We celebrated our seventh year collaborating with Athens High School, whose students grew seedlings for our annual plant sale fundraiser.

We distributed an abundance of greens, herbs, and vegetables to local food pantries, as well as to our volunteers as work share.

We continue to support the Mad Kitchen Club, a free after-school program in which kids ages 10 to 14 learn to make healthy snacks with take-home recipes.
